DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-5, 20, 25-27 has been considered but are moot in view of the new ground(s) of rejection.

Election/Restrictions

2. Claims 6-19, 21-24, are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 5.

Claim Rejections - 35 USC § 112

3. Claim 25 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 25 is rejected because the claim is drawn to a method for manufacturing a lithium secondary cell but the method steps are only toward the forming of the anode. The claim should instead be drawn to the method of making an anode and not to the battery.

Claim Rejections - 35 USC § 102

4. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Nakagiri et al. (JP 11, 288706, machine translation).

Nakagiri et al. teaches on page 7, [0058]-[0059] of the translation that a lithium foil was coated with LiF and LiCl. Nakagiri et al. teaches on page 6, [0048], that the negative electrode charge collector uses expanded metal made from nickel.

Claim Rejections - 35 USC § 103

5. Claims 3, 20, are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Nakagiri et al. (JP 11, 288706, machine translation).

Nakagiri et al. teaches on page 7, [0058]-[0059] of the translation that a lithium foil was coated with LiF and LiCl. Nakagiri et al. teaches on page 6, [0048], that the negative electrode charge collector uses expanded metal made from nickel.

In the event any differences can be shown for the product of the product by process claim 3, as opposed to the product taught by Nakagiri et al., such differences would have been obvious to one of ordinary skill in the art as a routine modification of the product in the absence of a showing of unexpected results. *In re Thrope* 227 USPQ 964; (Fed. Cir. 1985).

With respect to the product by process claim 3, the determination of patentability is based upon the product itself not upon the method of its production. *In re Thrope* 227 USPQ 964; *In re Brown* 173 USPQ 685; *In re Bridgeford* 149 USPQ 55; *In re Wertheim*

Art Unit: 1745

191 USPQ 90. Any difference imparted by the product by process limitations would have been obvious to one having ordinary skill in the art at the time the invention was made because where the Examiner has found a substantially similar product as in the applied prior art, the burden of proof is shifted to the Applicants to establish that their product is patentably distinct. *In re Brown 173 USPQ 685 and In re Fessmann 180 USPQ 324.*

Allowable Subject Matter

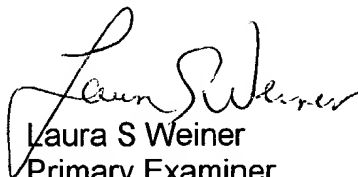

6. Claims 4-5 are allowed.
7. Claims 26-27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
